

1. Teams Chat Data

Support Chat for Haslet

Darrell Halterman 2/20 7:28 AM

How is memory looking this morning?

Kevin Buczek 2/20 8:11 AM

Gauri just called me saying building was saying something about optisweep but didn't finish because building

4-6 bots currently not moving in various areas after heartbeat issue

Christopher Corbett 2/20 8:13 AM

have they started a tech support call?

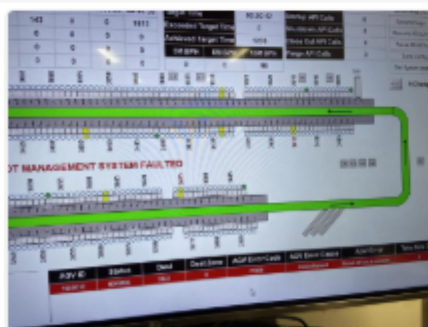

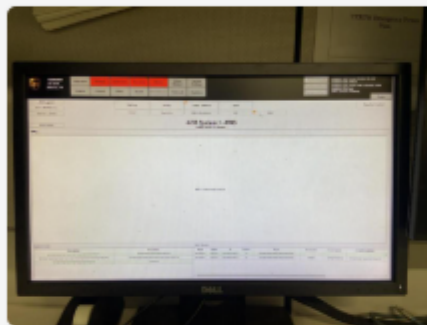

Kevin Buczek 2/20 8:14 AM

They have

They can't remove totes from hospital either and question marks on hmi

Ignition crash?

Jinhao Liu 2/20 8:21 AM

hi guys, i am talking with garrett bay from site now, he is making an cbre now. he said the issue is that nothing there was no fault or any failed AGVs.

this happened during normal operation also

[illegible]

Jinhao Liu 2/20 8:32 AM

 they are still on the techsupport hotline with me now, I am still waiting for the cbre now while remoting in

Jinhao Liu 2/20 8:44 AM

 got the cbre, i am trying to verify it now. i believe somebody else RDP in to take a look at it now?

Zane Bubb 2/20 8:45 AM

 i am on the RDP

Jinhao Liu 2/20 8:46 AM

 copy copy

[Zane](#) can you add me to the call if you are working on it? I want to keep track of it and learn a couple tricks also

Christopher White 2/20 8:52 AM

 please add me as well, if you don't mind

Jinhao Liu 2/20 8:53 AM

 adding you now

Kevin Buczek 2/20 8:53 AM

 Anyone able to quickly determine if ignition crashed or not?

Christopher Corbett 2/20 9:00 AM

 please add me to the call as well

Darrell Halterman 2/20 9:03 AM

 Zane, any chance you can take a 24-hr snapshot of Ignition Server memory usage to see if it crashed?
Please?

Christopher Corbett 2/20 9:05 AM

Jinhao Liu 2/20/2026 8:32 AM
they are still on the techsupport hotline with me now, I am still waiting for the cbre now while remoting in

Is UPS still on the tech support hotline? I want to make sure they're getting updates, their sort will end soon

Kevin Buczek 2/20 9:10 AM

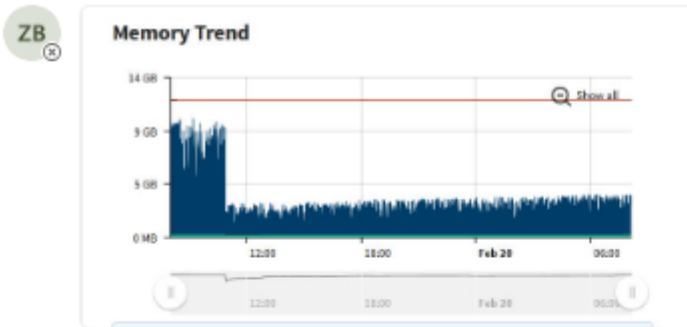

Christopher White 2/20/2026 8:52 AM
please add me as well, if you don't mind

[Christopher White](#) Does anyone on your team know how to see if ignition crashed and walk through UPS if it did restart server? If not, probably need to set something up with mitchel today on the steps.

[Christopher Corbett](#) Now Roy is asking for Sunday onsite startup support if we dont know the root cause of igniti yet

Zane Bubb 2/20 9:17 AM

Christopher White 2/20 9:17 AM

Kevin Buczek 2/20/2026 9:10 AM

Christopher White Does anyone on your team know how to see if ignition crashed and walk through UPS if it did crash how to restart...

we're looking at that now on the call

Christopher White 2/20 9:24 AM

site is currently finishing the bagout process, so we need to wait for them to finish that and un-e-stop the system to continue (they said it should be another 10-15min)

once the estop is removed, we will all rejoin the troubleshooting call and continue from there

Michael Langley 2/20 9:24 AM

Zane Bubb 2/20/2026 9:17 AM

No indication here that memory caused a crash. You can also check the CPU trend to see if anything there looks like a problem.

Jinhao Liu 2/20 9:24 AM

Christopher Corbett 2/20/2026 9:05 AM

Is UPS still on the tech support hotline? I want to make sure they're getting updates, their sort will end soon

They are not on the line now, they were manually bagging out now

Michael Langley 2/20 9:25 AM

Also in the main status page you can look at the uptime.

Christopher Corbett 2/20 9:27 AM

can I be added to the call when it resumes?

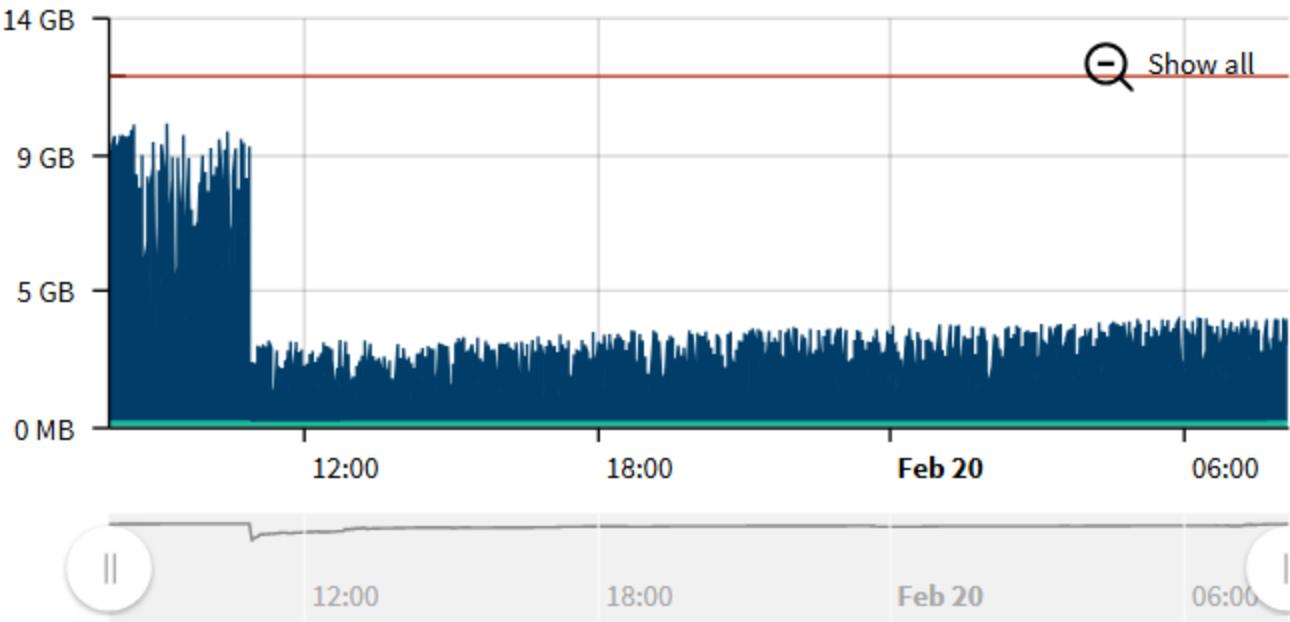

Did UPS leave the call to focus on operations, or did we end the call to get back with them on resolution? I want to make sure we're offering as much transparency with them as possible

Kevin Buczek 2/20 9:28 AM

Gauris message to me was that we would call them back and they had not been actively on a call because they were waiting on a call back

Memory Trend

Jinhao Liu 2/20 9:29 AM

JL i plan to call him back again with resolution

Mitchel Flynn 2/20 9:42 AM

We need a bridge with who is onsite. We cant help if they just estop and do whatever

Kevin Buczek 2/20 9:43 AM

Last I talked with Gauri they had been expecting a call back. Who was sent the link?

Jinhao Liu 2/20 9:43 AM

JL I'll add him to the call we were just in, when he is done with bag out

Kevin Buczek 2/20/2026 9:43 AM

Last I talked with Gauri they had been expecting a call back. Who was sent the link?

Meeting link?

Kevin Buczek 2/20 9:44 AM

Yes, who from UPS was sent the meeting link

I will call the building manager and ask them to get on

Jinhao Liu 2/20 9:44 AM

JL Garret is the called me also

Kevin Buczek 2/20 9:45 AM

Garret is the UPS person onsite?

Zane Bubb 2/20 9:45 AM

ZB They need to start the tippers

Christopher Corbett 2/20 9:46 AM

Kevin Buczek 2/20/2026 9:45 AM
Garret is the UPS person onsite?
he would be the main one- yes

Kevin Buczek 2/20 9:47 AM

So he has a link to the call emailed to him?

Jinhao Liu 2/20 9:47 AM

JL no he doesn't have a meeting provided to us

he is just done with the bag out now, so we can add him to our call instead

Kevin Buczek 2/20 9:48 AM

Typically our support sends a meeting link to UPS

Jinhao Liu 2/20 9:48 AM

No

he is just done with bagging out, I told him we will add him to our call now

Kevin Buczek 2/20 9:49 AM

We need to correct that going forward. That's usually the first thing we do is open up a bridge with UPS

Jinhao Liu 2/20 9:50 AM

aye

Mitchel and Zane site done with bagging out

Mitchel Flynn 2/20 9:52 AM

Are you not on the phone with them?

Jinhao Liu 2/20 9:52 AM

i was, i am going to add him to the team call we were just in

Mitchel Flynn 2/20 9:52 AM

From the system state it never started bag out

start a bridge

Jinhao Liu 2/20 9:52 AM

yea

Christopher White 2/20 9:53 AM

I was removed from the internal call/meeting chat, so I cannot rejoin... sounds like the same thing happened to Jin

yeah [Jinhao](#) just create a meeting and invite everyone from the earlier internal group, and send that meeting invite contact(s)

Mitchel Flynn removed Unknown User from the chat.

Jinhao Liu 2/20 9:53 AM

yea

Mitchel Flynn 2/20 9:54 AM

yea that was our team chat you were added to. not a customer support bridge

Kevin Buczek 2/20 9:55 AM

UPS called complaining again there's no bridge

Christopher White 2/20 9:55 AM

Mitchel Flynn 2/20/2026 9:54 AM

yea that was our team chat you were added to. not a customer support bridge

ah, fair enough

Kevin Buczek 2/20 9:56 AM

nmontero@ups.com

They are saying someone told them over a half hour ago they would be getting a call back and they went in the never got anything

Jinhao Liu 2/20 9:58 AM

start a group call now

Kevin Buczek 2/20 10:04 AM

gday@ups.com also needs the invite

Is it started with them?

Christopher White added Gino Junchaya to the chat and shared all chat history.

Christopher White 2/20 10:06 AM

please make sure we add [Gino Junchaya](#) and [Priyanka Tanpure](#) to the meeting you're starting

2

Mitchel Flynn 2/20 11:10 AM

Mitchel Flynn 2/15/2026 11:43 AM

No you can see in system errors a zone is missing an agv 🚚

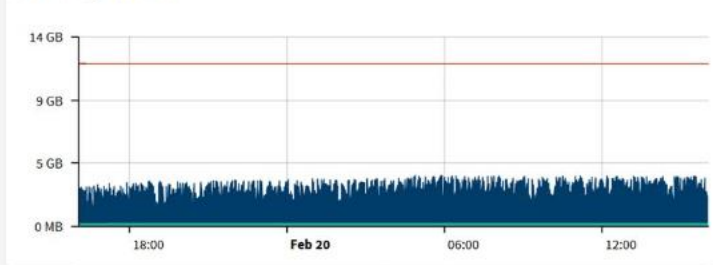

[Jinhao Liu](#)

Mitchel Flynn 2/20 5:21 PM

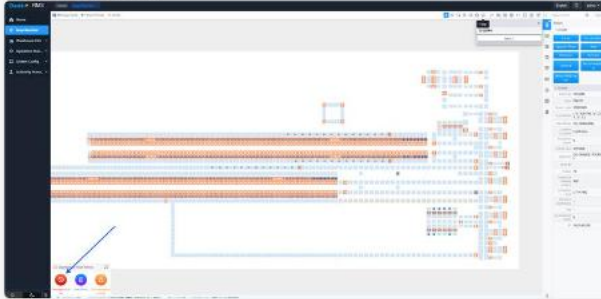

The memory trend is looking better

Memory Trend

But since I will be out of town this weekend and Monday. In the event that you do need to restart it here are the steps:
First Estop the system:

restart ignition running this command:

```
Microsoft Windows [Version 10.0.17763.2114]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Users\Administrator>cd C:\Program Files\Inductive Automation\Ignition\data

C:\Program Files\Inductive Automation\Ignition\data>ls -l
'ls' is not recognized as an internal or external command,
operable program or batch file.

C:\Program Files\Inductive Automation\Ignition\data>cd ..

C:\Program Files\Inductive Automation\Ignition>gwcmd -r
Waiting for Gateway restart...
```

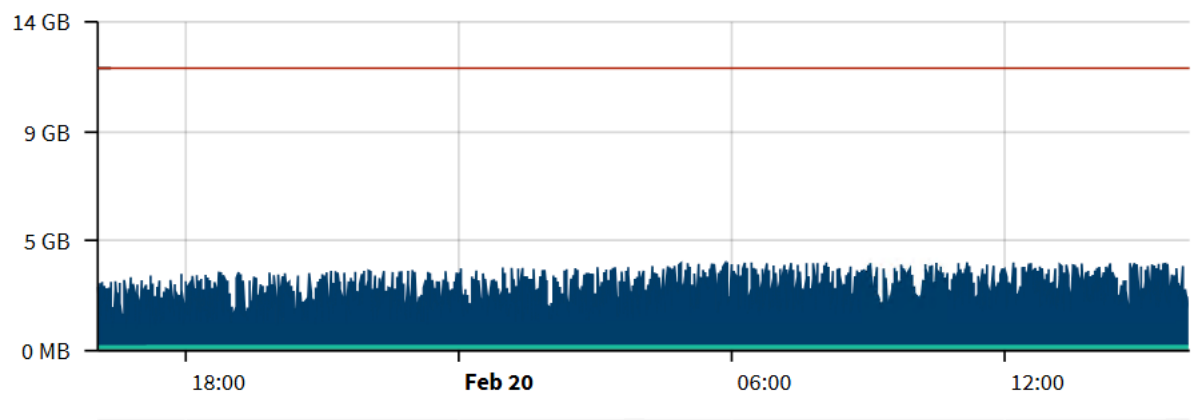

Wait for ignition to come back up (meaning it lets you log in and doesn't show gateway starting up):

verify the OptiSweep service is still responding to request after Ignition is restarted (I go into api dog and send a Get Agv Statuses request):

verify the Optisweep service is still responding to request after Ignition is restarted (I go into api dog and send a Get All Statuses request):

If no response is given you will need to restart Optisweep:

Once restarted, confirm by sending it another request.

Once confirmed release the estop

Monday, February 23

Christopher Corbett 2/23 9:18 AM

Mitchel will be ooo today - is someone from [Wesley Saunders](#)'s team able to pull the current status of the ignition and memory at Haslet? Will we be needing to perform a service reset today?

If we do need to perform a service reset - it'd need to be complete by noon today EST
