To: All

We started a bridge call with Keebler, Kevin Buczek, Huy Nguyen, Gino Junchaya. Keebler informed us that sit
manually and they are nowat the close-out stage. He asked if there is a way of bypassing close-out in the syst
down the system and then the robots can automatically go to charge stations. Gino is checking

The robots have been turned off at this time because the batteries are low and would die out

Comment

Bernard da Rocha
To: All

We have been joined on the call by Josiah Goedon and Ekram Nafis. After being briefed, Ekram did some che
to turn on the robots

Comment

Bernard da Rocha
To: All

The robots have been turned on and they are staying on so far. Mitchell Flynn has also joined the call

KT

AGV 202 is being taken out for good. Geek needs to look at it. For some reason it keeps losing QR code.

It was pulled a while back but for some reason it was added in when the system was messed up a couple of week

Keebler Thornton 4/3/2025 1:21 AM

KT

Who do I have for support

Need help with the hospital

Geoff Tewalt 4/3/2025 1:31 AM

Try calling Shane.

He might be awake to help. I don't know who is supposed to be supporting, but UPS should have a number to ca

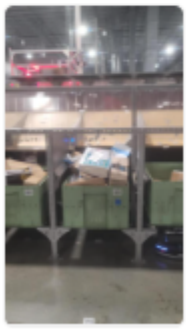

Keebler Thornton 4/3/2025 1:40 AM

KT

Shane helped me

Shane thank you so much for the help

It has not exchanged yet

Keebler Thornton 4/3/2025 1:49 AM

KT

We are good awesome again big thanks Shane

Keebler Thornton 4/3/2025 2:17 AM

KT Tipper 1 heartbeat

Keebler Thornton 4/3/2025 2:53 AM

KT System is not going into bagout

Need to check to see if one of the agv is stuck on task

Keebler Thornton 4/3/2025 3:00 AM

KT Hello we manually bagging out

Vishwas Kambalimath 4/3/2025 3:11 AM

 Shane Villalpando Mitchel Flynn Keebler needs help

They are manually bagging out . He needs AgV's moving for next sort and he can't tell which ones are at fault

Vishwas Kambalimath 4/3/2025 3:36 AM

 Keebler Thornton I Called Shane and Mitchel and Ekram.

Also called the tech support number and waiting on call back

Keebler Thornton 4/3/2025 4:03 AM

KT Early tonight tote 14 had gotten mixed around at the hospital. It read at hospital when it was actually in L385.
and he was able to help me. Everything ran smoothly then during bagout it went into request but never into s
manually bagged out

Vishwas Kambalimath 4/3/2025 4:29 AM

 218550 is the case number created by tech support

Kevin Buczek 4/3/2025 6:36 AM

 Wesley Saunders is there a support call going?

Vishwas Kambalimath 4/3/2025 6:43 AM Edited

 Mitchel Flynn Ekram Nafis need to look what is going on. I asked Keebler to remove and add AGV pairs in eac
one of the pairs will get the bag out starting

Now it started bag out, bagged out most but stopped

Kevin Buczek 4/3/2025 6:53 AM

Vish what is the reason of sharing this? I just jumped on with Keebler

Vishwas Kambalimath 4/3/2025 6:53 AM

If someone needs to join, that's all

I have ran out of options to try now. They already did what I asked them earlier

Kevin Buczek 4/3/2025 7:30 AM

Vishwas Kambalimath Keebler is talking to Ekram. We need to all get on teh support call

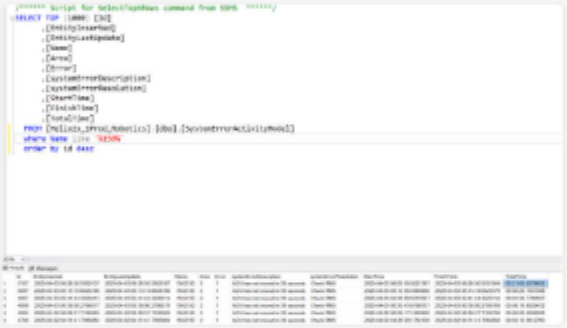

Roy wants Josiah to see

Mitchel Flynn 4/3/2025 9:05 AM

Since we can't see the screen in Aveva and they can't see it becuse UPS has updated it yet. You can check system active error

i checked the activity and see an agv didn't move for 3 hours

Ekram Nafis 4/3/2025 9:20 AM

Thanks Mitchel

Keebler Thornton 4/3/2025 9:21 AM

Thank everyone for the help

Are these time stamps UTC?

Mitchel Flynn 4/3/2025 11:30 AM

yes

Andy Ackley 4/3/2025 1:37 PM

Mitchel Flynn 4/3/2025 11:30 AM

yes

Andy Ackley 4/3/2025 1:37 PM

The HMI at the hospital is showing a fault

Should I unplug it?

Todd Fuchs 4/3/2025 1:39 PM

Hit acknowledge and try again.

No. Is the tote ID 28?

Andy Ackley 4/3/2025 1:39 PM

Magic

Todd Fuchs 4/3/2025 1:40 PM

All good now?

Andy Ackley 4/3/2025 1:40 PM

AA

Yes the tote at hospital is 28

Yes Sir all good

Todd Fuchs 4/3/2025 1:41 PM

ok, good

Harvey Dhillon 4/3/2025 2:10 PM

HD

Quick question, are we updating the HMI at site today?

To cover this task issue

Because that needs to happen asap along with the process to recover from a stuck task. If we can't then the debug c
identify a task is stuck needs to be created before the next sort

Ekram Nafis 4/3/2025 2:22 PM

UPS already have the latest HMI project. They have had it for a while now. We are waiting on them up push the char

> Harvey Dhillon 4/3/2025 2:10 PM
> Quick question, are we updating the HMI at site today?

Harvey Dhillon 4/3/2025 2:23 PM

HD

So it's them holding it back?

Ekram Nafis 4/3/2025 2:24 PM

That would be a fair statement

Harvey Dhillon 4/3/2025 2:25 PM Edited

HD

Ok because one of last nights errors (stuck task) is only visible on that HMI is what I hear

Ekram Nafis 4/3/2025 2:27 PM

that is correct.

Andy Ackley 4/3/2025 5:31 PM

AA

I've got a message fault that I haven't seen and no stack light faults.

Bagging out!

Keebler Thornton 4/3/2025 5:39 PM

KT

202 needs taken out it is messed up it needs to be tagged for Geek

Andy Ackley 4/3/2025 5:40 PM

AA

I'll get it after bag out

Keebler Thornton 4/3/2025 5:41 PM

KT

Is there anyway we can find out why the 5 others are out or cycle 1 or 2 into the system. Write numbers dow observations on them

Andy Ackley 4/3/2025 5:42 PM
