Site ran start up everything looked like it was running well. After about 15 minu
noticed the totes were not exchanging. They reached out to the project team w
put it in bag out mode. Bag out should have exchanged all the totes so site cou
totes and process them. They have not gotten any totes currently.

Site is experiencing another issue with them unable to exchange tote on the AGVS

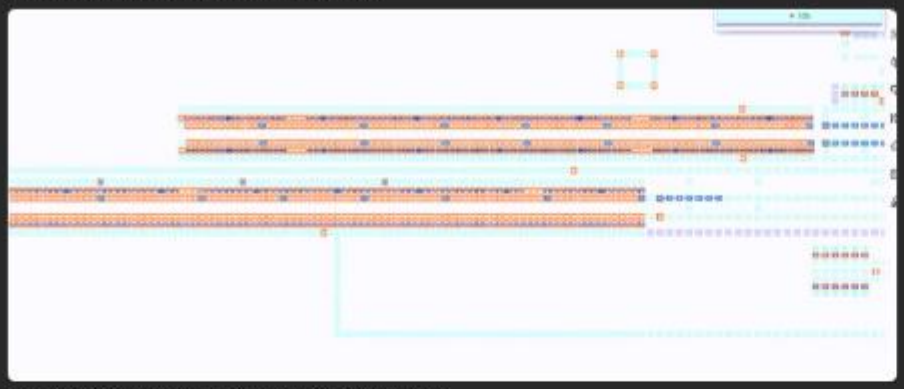

00233681 | Case | Salesforce

Andrew Clark 8/22 6:52 AM

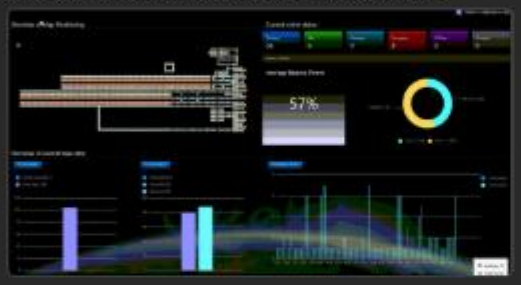

Hello Team, Haslet is stuck in a state where they are unable to bagout and all the AGVs are not able to exchange Totes. We cannot find what is causing the system to not be able to run. Please advise on what steps we should look into. Thank You

Andrew Clark 8/22 7:03 AM Edited

None of the AGVs are faulted or crashed.

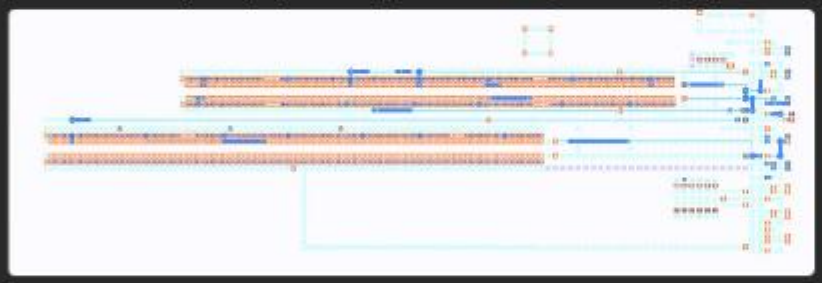

They do have 80 canceled tasks and 88 received

Andrew Clark 8/22 7:24 AM

We have started a system purge and things are now moving and exchanging totes. Will update once purge is done

Mitchel Flynn 8/22 8:48 AM

Harvey Dhillon 8/22 8:49 AM

What happened there?

Mitchel Flynn 8/22 8:50 AM

Stunnel to UPS chats went down yesterday

Harvey Dhillon 8/22 8:50 AM

Oh

Mitchel Flynn 8/22 8:51 AM

stunnel is kicking errors

Harvey Dhillon 8/22 8:53 AM

They did an update to otnet right? Is that going to affect this area. Or is it a seperate area

Mitchel Flynn 8/22 8:55 AM

it was at 9pm so some point while they were on the phone with us.

Harvey Dhillon 8/22 12:45 PM

So what changed that allowed the system to start back up? Us or UPS

Andrew Clark 8/22 12:49 PM

they had firewall issues they needed to fix. It was essentially blocking the scanners and sorter from communicating to our system

You should be getting a call from the on site Fortna team to explain things better

Harvey Dhillon 8/22 4:50 PM

Andrew nice job this morning getting things back on track. I chatted with ups and they are doing some analysis on their end about the firewall issues.

Shane Villalpando 8/22 10:31 PM

052 is stoping and going it is holding up one side of the sorter Andy Ackley remember to take it out tomorrow if it continues

👍

Andy Ackley 8/22 10:53 PM

It's one of the ones under the rack so I'll get it during the Sort

Kevin Buczek, Harvey Dhillon, Christopher Corbett. There are 63 AGV's in the system. We completed 57 of the 63 with a complete P.M.I. we can get the rest through out the week between Sorts. And we will start on the ones that are out of the system during the week while they are running.
Shane Villalpando, thank you again for the support,

👍 2
